

35 MILLION AMERICANS SUFFER FROM ARTHRITIS • OSTEOPOROSIS • BONE LOSS

Why Do Older People Have More Pain?

As we age, the foods we eat do not contain enough collagen-making nutrients to support an active lifestyle. That is why we have those aches and pains. Recent studies at Harvard Medical School proved **Type II Chicken Cartilage works in synchronization with the immune system by providing anti-inflammatory properties** that have been clinically demonstrated to decrease pain and discomfort stemming from joint disorders. Because our super **Collagen Peptides** contains **naturally occurring Chondroitin Sulfate and Glucosamine Sulfate**, it reduces oxidative damage to the joints.

Rheumatoid Arthritis (RA) is a chronic inflammatory disease of the joints resulting in damage to cartilage. Osteoarthritis (OA) is a degenerative joint disease characterized by the breakdown of the joint cartilage. The primary component of cartilage is Type II Collagen, a

structural protein that *provides strength and flexibility to the joints, muscles, tendons and the nerves.*

Proven • Effective Bio-available Nature's Premium Collagen & Hyaluronic Acid

There are several different kinds of collagen. **Collagen Peptides** is Collagen Type II, which is the predominant form used for the treatment of articular cartilage. **Collagen Peptides** contains free-range Type II Chicken Collagen free of growth hormones, antibiotics, pesticides, insecticides and is totally Kosher. We use organic raw material derived from pure chicken sternum cartilage of young chickens. The patented process that is used in our processing protects the naturally occurring levels of Hydrolyzed Collagen Type II proteins, low molecular glycosaminoglycans (GAGs), including a minimum of 20% Chondroitin Sulfate, Hyaluronic Acid (HA), Glucosamine Sulfate and other proteoglycans. In other words, ***you get all the nutritional benefits of naturally occurring Collagen Type II. Our product is a whole food.***

Improves Joint Mobility & Reduces Stiffness

Studies show Collagen Hydrolysate may protect articular cartilage from degradation and boosts collagen synthesis by increasing the secretion of collagen, suggesting the product could induce the formation of new cartilage tissue. Researchers have peaked their interest by using Collagen Hydrolysate as a therapeutic agent in the treatment of osteoarthritis and osteoporosis. Because of its high level of safety, it makes it a very attractive agent for long-term use in chronic disorders.

Collagen Peptides provides the proper building blocks in the appropriate environment (the human body) to rebuild lost cartilage and restore a healthy state to the cartilage in the joints.

The reality is that most of us abuse ourselves through the many lifestyle choices we make. Then, when we feel "**the pain**," which is our body's warning signal, we want a "**fast fix**". Most of us are unwilling to take the steps to become aware that

through discipline, proper nutrition, patience, responsibility and time, we can reverse the degenerative conditions that come with age, injury, over-abuse, etc. **Collagen Peptides**, being non-toxic and natural, can gradually correct a problem that has been present, taken-for-granted, or ignored over a period of years. **Remember**, we didn't get to the *"state we're in"* overnight and it won't be *"fixed"* overnight.

See what a commitment to the *"healing process"* can do for you.

For People Who Have Tried Glucosamine & Chondroitin Without Success

Many researchers focused on supplemental doses of Glucosamine and Chondroitin which both rely on the body's ability to convert them to collagen. **Collagen Peptides** is loaded with collagen and *both naturally occurring* Chondroitin and Glucosamine, which makes our product a superior supplement.

Additional Benefits

Being a key building block for several processes of the body, many people notice their nails grow noticeably faster, their hair strands

get thicker, and their skin becomes softer.

Collagen Peptides is great for athletes, body-builders, weight-lifters, martial artists, tennis players, golfers and joggers by protecting against over-stressed joints and promoting full range of motion and mobility. As with any nutritional supplement, it is best if taken by itself and not with any prescription medications.

End Pain And Joint Stiffness

"Try **Collagen Peptides** for 30 days and experience being pain free. I guarantee it!"

Dr. LaMar

Extra Note

For a great supplement for any skin condition, use **Collagen Peptides**. *Your skin will be young again.*

The Best Way To Take Collagen Peptides

Suggested Dosage: 2 capsules 3 times a day.

Before taking, pause for a moment and *"Give God the Glory For Your Health."* Tell Him what you want the nutrients to do for you and *"Feel the Difference!"*
