

OxyBowel™

"The Ultimate Oxygenating Colon Cleanser"

OxyBowel™ is a safe & effective dietary supplement available in a capsule. It is highly effective and non-habit forming. **OxyBowel™** is an excellent alternative for *Oxygen Supplementation and Colon Cleansing*. **OxyBowel™** offers its users a number of benefits in a safe and effective manner.

What is Stabilized Oxygen?

Stabilized oxygen is a non-technical term referring to a compound containing oxygen atoms which are stabilized with buffers so that the product can be bottled without the oxygen being released before it is needed. The result is a stable environment of oxygen which can be taken as a dietary supplement.

What is OxyBowel™?

OxyBowel™ is a combination of powdered magnesium oxide compounds which have been ozonated and stabilized to release mono-atomic or nascent oxygen over 12 hours or more. The timed release ensures that **OxyBowel™** will provide an adequate amount of oxygen slowly, for better utilization. Take 1 or 2 capsules in the morning when you get up and again at bedtime for 24 hours of protection.

How Does OxyBowel™ Work?

OxyBowel™, when in an acidic environment, begins to slowly release nascent or mono-atomic oxygen. The release of oxygen continues throughout the digestive system. The magnesium acts as a vehicle to transport the oxygen throughout the body. Remember, we are 59% oxygen. We need twice as much oxygen as we need food for life. *Oxygen = ENERGY*

By-Products:

The by-products of **OxyBowel™** are magnesium in an oxide form and nascent oxygen. In its oxide form, very little magnesium is assimilated by the body. It passes through the intestinal tract, kidneys and bladder, helping to cleanse by delivering oxygen along the way. Therefore, it is the perfect vehicle for transporting oxygen. Say good-bye to kidney and bladder infections.

Toxemia - What Is It?

My teachers, respected medical doctors, believed and taught that toxemia is the basic cause of disease. Toxemia occurs everyday because of the food we eat, the water we drink, and the environment we live and work in. Your digestive system has to process all this and eliminate the waste products. If not, you can believe toxemia is well on its destructive course. Extra oxygen in usable form (nascent O₂) is the way to balance this from happening. **OxyBowel™** means more energy and better elimination.

Benefits:

OxyBowel™ offers a number of benefits to its users. However, everyone is unique and the effects of **OxyBowel™** will vary depending on the individual.

The **OxyBowel™** capsules contain citric acid, which prompts the release of oxygen. Some competitor products contain antioxidants as an ingredient. An oxidative product should never contain ascorbic acid (Vitamin C) or any antioxidant because it neutralizes any oxygen released making the product ineffective.

- **OxyBowel™** laxative effect on the body helps to loosen intestinal build-up which aids in the release of unwanted waste materials and toxic substances that may be present. A build-up of intestinal waste may cause an overgrowth of anaerobic bacteria, which thrive in such an environment.
- **OxyBowel™** slow release of mono-atomic oxygen creates an inhospitable environment for anaerobic bacteria and other toxic matter without affecting the friendly bacteria which are needed for proper digestive and intestinal health.

Considerations About Stabilized Oxygen:

When considering an oxygen product, there are, no doubt, many health supplements from which to choose. Things to consider when looking for a high quality oxygen supplement.

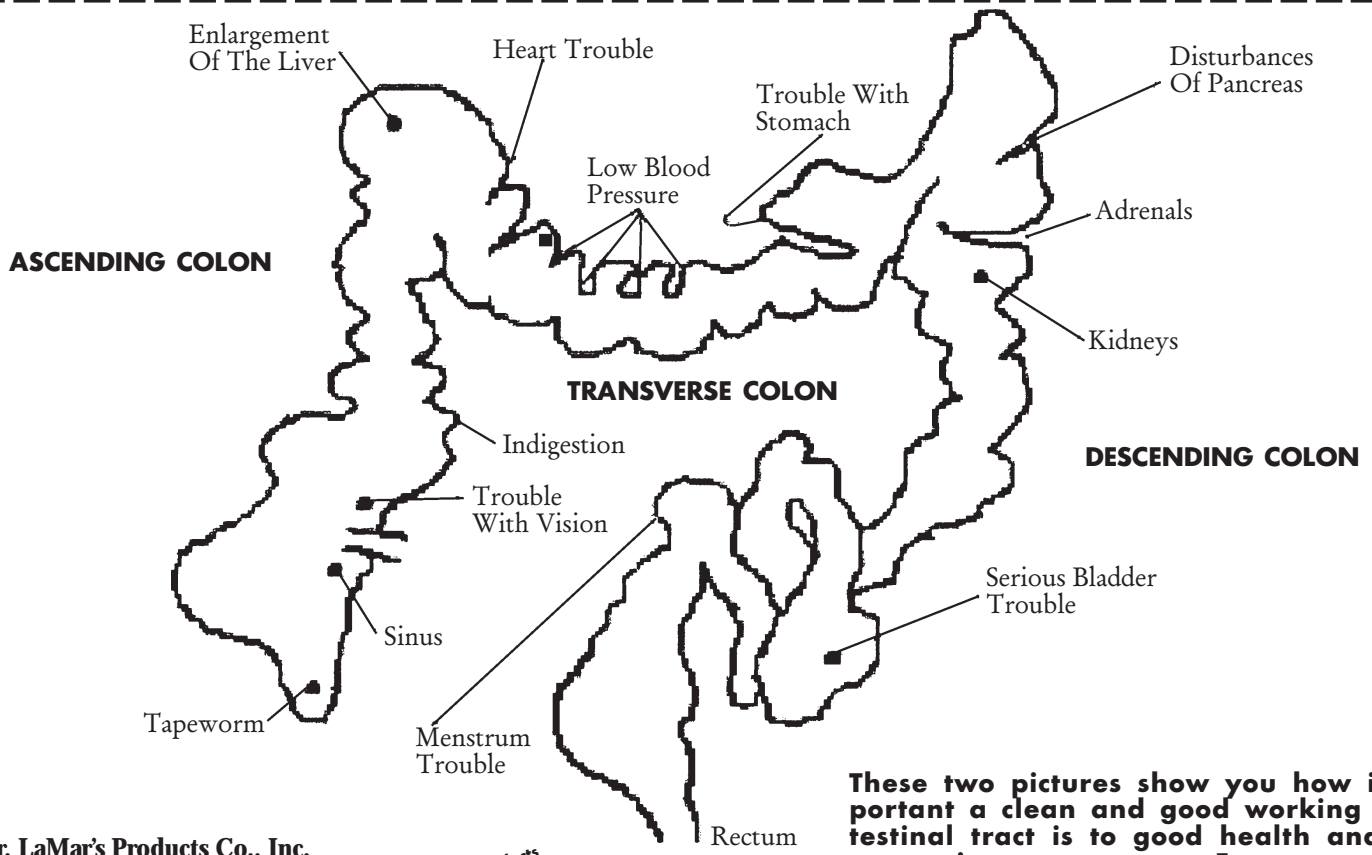

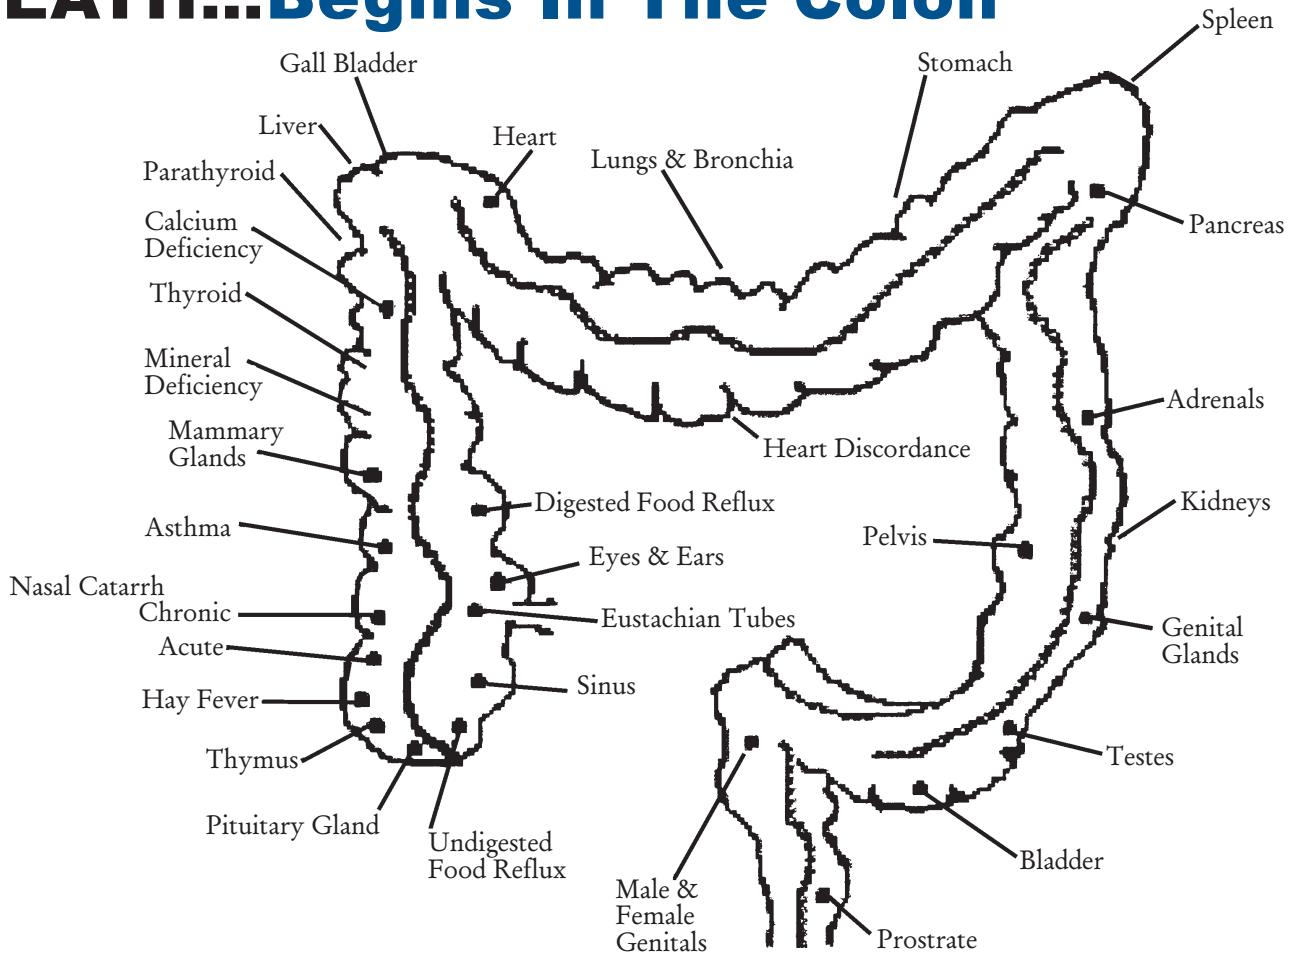

- Does the product actually release *SINGLE ATOMS* of oxygen? Our product guarantees oxygen release! An independent laboratory tests every batch of **OxyBowel™** by iodometric titration to ensure product integrity, quality control, and consistent oxygen release.
- In order to provide a stable environment for oxygen atoms, they must be bound to a stabilizing compound. It is important to choose an oxygen product that has stabilizers that provide a stable environment and allow for a controlled release of oxygen.
- Antioxidants protect cellular structures in the human body. Oxygen is our bodies natural detoxifier. Therefore, it is important when anyone takes an oxygen supplement to also take antioxidants, such as **FiberAide®**. This will ensure that the cells will be properly protected while oxygen cleanses the body. Although be sure to take the antioxidant at a different time (at least an hour before or after taking an oxygen supplement) to ensure no oxygen is wasted.

Before Taking...

Pause for a moment and *"Give God the Glory For Your Health."* Tell Him what you want the nutrients to do for you and *"Feel the Difference!"*
